

IN THE CLAIMS

Please amend the claims as follows:

D' 8. A visual display of a panoramic region, comprising:

an active display comprising a series of active images that are generated from temporally sequential frames of visual data, wherein

each frame of visual data represents an image defining a region within the panoramic region such that at least two of the images define regions that do not coincide; and

each displayed image is positioned on a display screen with respect to the position of other displayed images on the display screen in accordance with the spatial relationship in the panoramic region of the content of the displayed image to the content of the other displayed images; and

a context display comprising one or more context images displayed while an active image is displayed, each context image being at least part of an image represented by a previously displayed frame of the set of temporally sequential frames of visual data, said frame no longer corresponding to an active image such that the context image is displayed as a static image.
